Computer simulations offer insight on the physics of fracking
Researchers at the Idaho National Laboratory have developed simulations that provide a better understanding of the physics of shale oil formations. Coupled with high-resolution 3D imagery, the simulations could lead to more efficient fracking.

Eyeing Delaware, DJ Basins, Noble exits Marcellus shale for \$1.2B
The margins possible from its Delaware and DJ Basin assets were responsible for Noble Energy's exit from the Marcellus shale. In a \$1.2 billion deal with an undisclosed buyer, Noble has divested its Marcellus assets to focus on liquid-rich shale.
