Computer simulations offer insight on the physics of fracking
 Researchers at the Idaho National Laboratory have developed simulations that provide a better understanding of the physics of shale oil formations. Coupled with high-resolution 3D imagery, the simulations could lead to more efficient fracking.

Eying Delaware, DJ Basins, Noble exits Marcellus shale for SLLB
 The margins possible from its Delaware and DJ Basin assets were responsible for Noble Energy's exit from the Marcellus shale. In a \$1.2 billion deal with an undisclosed buyer, Noble has divested its Marcellus assets to focus on liquid-rich shale.
